PROFESSIONAL SUMMARY

Technician with experience in desktop support, hardware troubleshooting, PC assembly, and Windows configuration. Skilled in diagnosing hardware/software issues, replacing components, configuring workstations, and supporting end users. Additional experience in operations, inventory coordination, and customer service in high-volume environments.

PROFESSIONAL EXPERIENCE

IT Technician

DAV College

- Diagnosed hardware and software faults across desktop computers used by staff and students; resolved most issues same-day or within one business day.
- Built computers from scratch — selected compatible components, assembled units, and configured them for deployment on the college network.
- Replaced and upgraded components including RAM, HDDs, SSDs, GPUs, and power supplies based on performance requirements or hardware failure.
- Installed and configured operating systems (Windows) and standard software applications on new and repaired machines.
- Troubleshoot network connectivity, printer, and peripheral issues for end users; escalated unresolved cases to the appropriate team.
- Maintained and repaired a fleet of ~80 desktop computers across two labs and administrative offices.
- Maintained a log of recurring issues to identify patterns and reduce repeat repair calls over time.

Manager Trainee / Rental Agent

Hertz Car Rental | Vancouver, BC

- Processed vehicle rentals end-to-end — verified IDs, reviewed agreements, handled payments, and ensured all paperwork was complete before keys were handed over.
- Tracked and managed fleet inventory across the lot; flagged vehicles due for service or repositioning and coordinated with the service team.
- Handled customer inquiries and complaints directly, including resolving billing disputes and adjusting reservations on the spot.
- Supported daily branch operations alongside the branch manager — shift planning, vehicle turnaround, and keeping things moving during peak hours.
- Trained on manager-level responsibilities: opening/closing procedures, staff coordination, cash reconciliation, and basic performance tracking.

EDUCATION

Post-Degree Diploma — Web & Mobile App Development

Langara College, Vancouver, BC

Focus: Full-stack development, mobile applications, cloud deployment, JavaScript frameworks (React, Node.js)

Bachelor of Computer Applications (BCA)

Panjab University

Core coursework: Computer networks, database systems, operating systems, software engineering

SKILLS

IT & Technical:	Hardware repair & assembly Desktop support OS installation & configuration (Windows) Troubleshooting & diagnostics Component upgrades (RAM, SSD, GPU, PSU) Network setup Peripheral configuration
Software:	Microsoft Office Suite Ticketing & incident logging Active Directory (basic) Remote desktop support Trello CRM systems
Operations:	Fleet & inventory management Rental processing Scheduling & coordination Documentation & compliance Cash reconciliation
Maintenance:	Hardware inspection Preventive maintenance Vehicle condition appraisal Safety awareness

CORE STRENGTHS

Communicates clearly with both technical and non-technical users | Stays composed and focused in high-volume or time-sensitive situations | Reliable and consistent — follows through on tasks and shows up prepared

LICENSES & TRANSPORTATION

Valid BC Driver's License — Class 4 | Access to personal vehicle for work-related travel
