PROFESSIONAL SUMMARY

Hands-on technician with experience in IT support and customer-facing service roles. Background includes diagnosing and repairing desktop hardware, building computers from scratch, and managing software installations and configurations. Also experienced in rental operations — processing agreements, managing fleet inventory, and handling customer concerns directly. Holds a valid BC Class 4 Driver's License with access to personal transportation. Works well independently, adapts quickly to new tools and environments, and stays composed under pressure.

PROFESSIONAL EXPERIENCE

Manager Trainee / Rental Agent

Hertz Car Rental | Vancouver, BC

2024 – 2025

- Processed vehicle rentals end-to-end — verified IDs, reviewed agreements, handled payments, and ensured paperwork was complete before keys were handed over.
- Tracked and managed fleet inventory across the lot; flagged vehicles due for service or repositioning and coordinated with the service team.
- Handled customer inquiries and complaints directly, including resolving billing disputes and adjusting reservations on the spot.
- Supported daily branch operations alongside the branch manager — shift planning, vehicle turnaround, and keeping things moving during peak hours.
- Trained on manager-level responsibilities: opening/closing procedures, staff coordination, cash reconciliation, and basic performance tracking.
- Maintained accurate rental records and daily transaction logs; ensured compliance with company policies and documentation standards.

IT Technician

DAV College | Punjab, India

2023 – 2024

- Diagnosed hardware and software faults across desktop computers used by staff and students; resolved most issues same-day or within one business day.
- Built computers from scratch — selected compatible components, assembled units, and configured them for deployment on the college network.
- Replaced and upgraded components including RAM, HDDs, SSDs, GPUs, and power supplies based on performance requirements or hardware failure.
- Installed and configured operating systems (Windows) and standard software applications on new and repaired machines.
- Troubleshoot network connectivity, printer, and peripheral issues for end users; escalated unresolved cases to the appropriate team.
- Maintained a basic log of recurring issues to identify patterns and reduce repeat repair calls over time.

EDUCATION

Post-Degree Diploma — Web & Mobile App Development

Langara College, Vancouver, BC

May 2024 – Dec 2025

Focus: Full-stack development, mobile applications, cloud deployment, JavaScript frameworks (React, Node.js)

Bachelor of Computer Applications (BCA)
